## PLANTER CLUSTERS

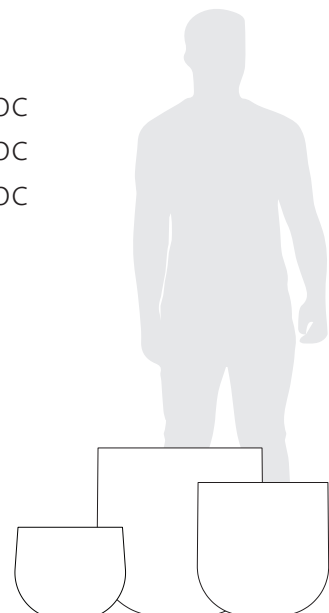

A collection of different sized pots or containers, in different designs, with a variety of plants, are a unique way to add a personal touch to your indoor or outdoor space. Whether you have a balcony, terrace, rooftop or garden, a cluster of pots can be tailored to suit your own style and add that extra special touch.

The great thing about creating a cluster of different planters is that you have the flexibility to change the design. Plants, angles, position and pot design can easily be adjusted as and where needed. Gardening in pots and containers is a great alternative for those of us who don't have a yard, lawn or garden bed.
